PROFESSIONAL SUMMARY

Backend developer with 5 years of experience building scalable web applications using MERN Stack, along with strong hands-on expertise in Magento 2 and Laravel. Experienced in developing secure APIs, optimizing performance, managing databases, and delivering reliable e-commerce and business solutions. Passionate about modern web technologies, clean architecture, and building user-focused, high-quality applications.

SKILLS

- MERN Stack
- NextJS
- Magento 2
- Laravel
- WordPress
- PHP
- JavaScript (ES6+)
- Nodejs
- Express.js
- React.js
- Redux Toolkit
- React Redux
- React Hooks
- MongoDB
- SQL/MySQL
- PostgreSQL
- Git
- Github
- Docker
- POSTMAN
- RESTful API Development

EXPERIENCE

SR. MERN STACK DEVELOPER

Nov 2024 – Present

TEKGLIDE

Karachi, Sindh

- Designed, developed, and maintained scalable full-stack applications using MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Built secure and optimized RESTful APIs using Node.js & Express, implementing JWT-based authentication and authorization
- Worked extensively with asynchronous programming, handling promises, async/await, and background processes
- Designed and optimized database schemas using MongoDB, MySQL, and PostgreSQL, ensuring data integrity and performance
- Integrated backend APIs with React.js frontend, ensuring seamless data flow and user experience
- Implemented state management using Redux Toolkit and React Redux for scalable application architecture
- Strong hands-on experience with React Hooks (useState, useEffect, useContext, useMemo, useCallback)
- Developed reusable and modular UI components following best practices
- Optimized application performance and handled API error handling, validations, and logging
- Lead entire project and completed the deadlines
- Direct communication with clients and manage the workflows
- Collaborated with cross-functional teams to gather requirements and deliver high-quality features
- Experience with version control (Git/GitHub) and agile development workflows
- Familiar with deployment and production builds, including environment configuration and API security best practices
- Experience in role-based access control (RBAC)
- Knowledge of API documentation using Postman / Swagger
- Experience with cloud deployment / hosting (AWS / DigitalOcean / Vercel / Netlify)

SR. BACKEND DEVELOPER

May 2021 – Nov 2024

TEKGLIDE

Karachi, Sindh

Magento:

- Developed all kind of CMS solutions for Magento stores.
- Smooth Framework upgrades.
- Apply Quality/Security patches.

- GraphQL
- Linux
- Lead Projects
- HTML/CSS

REFERENCES

References available upon request

LANGUAGES

Urdu | Native

English | Fluent

- Theme upgrades and fix the runtime issues.
- Performance Optimisations.
- Fixed deprecated functions
- Fixed the extensions inter conflicts.
- Executed multi-store development strategies.
- Resolved compatibility issues for pre-developed extensions from the marketplace
- Integrates the third party (Endicia, UPS, Sports South etc).
- Work on RESTful, GraphQL, and SOAP API development, enabling seamless communication between different software systems.
- Deploy on a live server.
- M1 to M2 Migrations
- Use version control systems for tracking and managing changes to software code. (Github, BitBucket, Beanstalk).
- Tested various APIs using tools such as POSTMAN, SoapUI, RapidAPI

Laravel:

- Create secure custom Admin Panel & Storefront on a laravel.
- Developed all kind of CMS solutions on laravel.
- Created custom Secure/Exposed API's.
- Much familiar with the Eloquent Model & Query Builders.
- Integrate third party system with the website.
